PROJECTS

- Procurement Workflow Optimization System** – Undergraduate Thesis *C#, .NET, SQL*
 - Developed a web-based system that analyzes procurement approval workflows to pinpoint bottlenecks.
 - Forecasted completion times and assessed delay risk for pending requests.
 - Prioritized the approval queue using classical optimization and quantum-inspired heuristics.
- CheckMatePH** – Top 12 Finalist, SIKAPTala 2026 Hackathon *Next.js, TypeScript, Supabase, OpenAI API*
 - Built an AI-powered platform for political fact-checking and civic engagement.
 - Integrated the OpenAI API to analyze claims and generate fact-check results.
- Unloque** – Welfare Access & Analytics Platform *Flutter, Firebase, Next.js*
 - Visualized population and beneficiary distribution on real-time maps.
 - Applied AI-driven analysis to identify underserved areas and guide resource allocation.
 - Created an analytics dashboard with reports for health, education, and social welfare programs.
- Liwanag** – Open iT Bootcamp 2026 *React, ASP.NET Core, PostgreSQL, Docker*
 - Built a full-stack web app for monitoring energy consumption.
 - Estimated electricity costs from usage data to help users anticipate their bills.
 - Completed the project in 17 hours during the Open iT Bootcamp 2026 capstone.
- Yougyog** – Open iT CodeFest 2025 *React, Express.js, Socket.IO, USGS API*
 - Built a real-time earthquake warning system with configurable alerts.
 - Provided safety instructions, event summaries, and historical earthquake visualization.
 - Completed the project in 17 hours during Open iT CodeFest 2025.
